## 1 How to use etbox

### 1.1 The general latex command

The general command for creating a box is `\etbox{box_type}{box_label}{box_title}{box_contents}` where

- `box_type` can be one of `h` (highlight), `i` (information) and `r` (result)
- `box_label` is the label of the box that can be referred to by `\ref{box_label}`
- `box_title` is the title appearing as numbered headline of the box
- `box_contents` is the content that should be within the box. This can be simple text, but also figures and tables can be included

### 1.2 A Highlight-box

Below there is an example latex code for creating an etbox of the type highlight. The result is the box 1.1.

**1.1: This is a Highlight box**

This is the content you want to highlight

And here the corresponding latex code:

Below there is an example latex code for creating an etbox of the type highlight. The result is the box `\ref{box:highlight}`.

```
\etbox{h}{box:highlight}{This is a Highlight box}{This is the content you want to highlight}
```

### 1.3 An Information-box

Below there is an example latex code for creating an etbox of the type information. The result is the box 1.2.

## 1.2: This is an Information box

This is the information...

And here the corresponding latex code:

Below there is an example latex code for creating an etbox of the type information. The result is the box~\ref{box:information}.

```
\etbox{i}{box:information}{This is an Information box}{This is the information...}
```

## 1.4 A Result-box

Below there is an example latex code for creating an etbox of the type result. The result is the box 1.3.

## 1.3: This is a Result box

This is the result you want to emphasize...

And here the corresponding latex code:

Below there is an example latex code for creating an etbox of the type result. The result is the box~\ref{box:result}.

```
\etbox{i}{box:result}{This is a Result box}{This is the result you want to emphasize...}
```

## 2 Remarks

There are some rules that needs to be followed when editing the `contents` of the `etbox`.

1. linebreaks: If there should be a linebreak in the text, one has to use the `\\` command. **There are no blank lines allowed.**
2. floats: If one want to place a float (e.g. a figure or a table) in the etbox, one has to constrain latex to put the float right in place. This can be done by using the option `[H]` , i.e `\begin{figure}[H]`

### 2.0.1 Figures in etboxes

The following code illustrates how to create box 2.1 that contains linebreaks and a figure.

```
\etbox{r}{box:example}{This is a box containing a figure}
{To create a linebreak in the etbox, you have to use the \\command, here it comes\\
And here is the new line...\\
...and here another one. If you want to place a figure here force latex to place it here by us-
ing the option [H]
\begin{figure}[H]
\centering
\includegraphics[scale=1]{ET-Logo.png}
\caption{This is the caption of the figure...}\label{fig:logo}
```

```
\end{figure}
What a nice picture...}
```

## 2.1: This is a box containing a figure

To create a linebreak in the etbox, you have to use the `\\` command, here it comes  
And here is the new line...  
...and here another one. If you want to place a figure here force latex to place it here by using the option [H]

Figure 1: This is the caption of the figure...

What a nice picture...

### 2.0.2 Tables in etboxes

The following code was used to generate box 2.2. Please note the command in line 09.

```
01 \etbox{i}{box:tab}{This is a box containing a table}{
02 Some text some text some text some text some text some text some text
03 some text some text some text some text some text some text some text
04 some text some text some text some text some text some text some text
05 some text refer to Tab.~\ref{tab:table}.
06 \begin{table}[H]
07 \begin{center}
08 \caption{The table appears with the right color\dots}
09 \color{\contentcolor}
10 \begin{tabular}{ccc}
11 \hline
12 \hline
13 Column 1 & Column 1 & Column 3\\

18 \end{tabular}
19 \label{tab:table}
20 \end{center}
21 \end{table}}
```

```

\floatstyle{ruled}

\end{framed}  
\end{minipage}  
\end{center}  
\vspace{9pt}  
\arrayrulecolor{black}  
\color{black}  
}
```

## 4 Coloring the boxes

The color style of the boxes can be easily changed by using other color names at

```
\newcommand{\titlecolor}{white}  
\newcommand{\captioncolor}{white}  
\newcommand{\contentcolor}{white}
```

The background color is chosen by a command like

```
\definecolor{shadecolor}{cmyk}{.0,.8,.7,0}
```

An overview of the colors is attached to this document.
